

Mission Statement

Vision – To aspire to consistently exceed customer expectations, as we believe this will show we care about them personally, therefore providing confidence and reassurance that we work swiftly and effectively on their behalf. Our belief is by providing, excellent customer services this develops a platform going forward of sustainable commercial viable growth.

Mission – We only consider earning our livelihood through the safe management of commercial waste. Our objective is to achieve waste recovery on behalf of our customers, therefore reducing the need for landfill and the impact landfill has on the natural environment. We endeavour to enforce a policy of recycling/ re-use as the best environment option. Care will be taken in all activities, to act in a socially responsible manner enhancing the quality of the environment.

Goals – Build on existing trust with current and future employees, allowing for the development of the mutual respect required to create confidence in people. I believe trust gives recognition and displays the importance of individuals and their diverse opinions. Trust to me compels us to share information and encourage new ideas it requires an open, honest, forthright manner. Trust is often overlooked as a significant tool that should be used within a business, I cannot begin to consider how a company without trust can sustain its position if no trust exists within our company undoubtedly this reflects on how our customer perceives us.

Summary – I am sure you will give full consideration to this statement and therefore hope it expresses' the companies sincerest of intentions to deliver a service that is beneficial in every way to one and all.

To always remember to say a **“BIG THANK YOU”** from all at European Waste Solutions Ltd for potentially creating a business opportunity, as we realize our customers have choices

Action Plan – To utilise a national infrastructure of the most localised preferred partners.
